Europe has been a pioneer in the implementation of environmental, social and governance rules. From now on, beyond shareholder engagement, non-financial criteria are becoming a tool for selectivity but above all for improving social practices, governance and environmental footprint.

2 MANAGEMENT OBJECTIVE

This UCITS is actively managed on a discretionary basis. Its investment objective is to offer performance linked to the trend in international equities which, according to the management company's analysis, are benefiting from the transformations of the economy (digitalisation, automation). A benchmark index is not required for this type of management strategy, in which the manager is allowed flexibility in asset allocation. Nevertheless, the performance of the UCITS may be compared with that of a benchmark index such as the MSCI AC World Index. Asset allocation and performance may differ from the composition of the benchmark.

VOTING POLICY available on the website

Crédit Mutuel Asset Management's proprietary ESG analysis model uses a tool to assess the risks and opportunities related to the environmental and social transitions of the issuers making up the portfolio. The analysis of issuers covers five main pillars : environmental, social, societal, governance and the company's commitment to a socially responsible approach. A rating is then calculated based on three components (environment, social and governance), which enables us to position the portfolio in terms of ESG. The exercise of voting rights and dialogue with issuers round out our responsible investor approach.

3 ESG RATING
CREDIT MUTUEL ASSET MANAGEMENT

	Portfolio out of 10	Comparison Indi- cator out of 10
Note globale	5.86	5.8
E rating (Environment)	5.86	5.7
S rating (Social)	5.04	5.0
G rating (Governance)	6.93	6.9

4 MANAGEMENT COMMENT

Your innovative stocks fund ended the quarter up 13.6%, 3% ahead of its benchmark. Microsoft (+14.8%), Nvidia (+86%) and ARM (+74%), all key players in the rollout of artificial intelligence, were the main contributors. In March, the fund underperformed due to the rise in real interest rates and disappointing results from Accenture, Adobe and MongoDB. We added to Nvidia, but sold ARM because its valuation is too high. The Nvidia conference reiterated the strengths of the model: a holistic platform (software-platform-hardware) ensuring a return on investment in high-performance computing and unrivalled AI models. Blackwell's multimatrix chip system improves the performance of large AI models by 4X in training and 30X in production. Its technological lead, 65% operating margin and ability to maintain a sustained R&D effort set it apart. MongoDB was the main negative contributor over the month (down 19.9%), with a disappointing 14% sales growth target for 2025. Lastly, our Asian players such as SK Hynik (memory chips, South Korea) gained +14.1%, as did Tencent (+9.6%), whose results reveal strong trends in advertising, payments and a recovery in margins. We trimmed Accenture, Adobe, STM and AMD in favour of First Solar.

6 A WORD FROM RESPONSIBLE FINANCE

After two years of consultation, the Security and Exchange Commission has just published its climate reporting rules. While the initial text provided for the publication of greenhouse gas emissions in all three scopes, the final version is limited to the first two, which represent on average only 25% of a company's emissions, according to recent estimates by the Carbon Disclosure Project. In addition, this disclosure is now only required for the largest companies that consider this risk to be material for them; growth companies and companies of limited size are not affected. Although it is not very restrictive, this regulation is already being challenged by no less than 10 states and may therefore never come into force.
