

# ANNUAL REPORT

CM-AM CASH ISR

French open-end investment fund (FCP)

Financial year from 01/04/2022 to 31/03/2023

# **CHARACTERISTICS OF THE UCI**

Legal form: Open-end investment fund (FCP)

## **• Investment objective**

This UCITS is actively managed on a discretionary basis according to a qualitative non-financial filter in line with the policy implemented by Crédit Mutuel Asset Management and in compliance with the requirements of the French SRI label. The investment objective is to seek a performance, net of the actual management expenses applicable to this unit category, equal to that of its benchmark index, the capitalised €STR, over the recommended investment period. In the event of particularly low, negative or volatile interest rates, the fund's net asset value may fall structurally, which could have a negative impact on your fund's performance and compromise the investment objective related to the preservation of capital. The benchmark index is the capitalised €STR. The index is analysed at its closing price and expressed in euros. It takes into account the capitalisation of interest for the €STR.

## **• Investment strategy**

In order to achieve the management objective, the UCITS' management strategy consists in establishing a universe of targeted securities thanks to a non-financial process supplemented by financial analysis. The UCITS adopts an active management style in order to achieve a performance close to that of the money market in a context of market risk comparable to that of its benchmark, while ensuring steady net asset value growth. The universe of eligible issuers is that of OECD companies issuing debt securities. Within this universe, eligible instruments are money market instruments meeting the criteria of Regulation (EU) 2017/1131 on money market funds (MMFs) and term deposits with credit institutions. The management process applied to these instruments consists of three stages:

1° ESG filter: the management team will apply non-financial filters based on ESG criteria derived from a proprietary methodology developed by the Responsible and Sustainable Finance analysis unit. These filters cover governance, societal, social and environmental criteria, as well as the commitment of companies or governments to a socially responsible approach. By way of illustration, for pillar E: carbon intensity, for pillar S: human resources policy, and for pillar G: the proportion of independent directors are included in our ESG categories. The management team will apply a selective approach, developed in the prospectus, consisting in favouring the highest-rated issuers or those demonstrating good prospects for their ESG practices. In terms of controversy management, each security is subject to specific analysis, monitoring and rating. Management will exclude all issuers with major controversies. This approach eliminates at least 20% of the lowest-rated securities.

2° Financial analysis: this new universe is analysed from a financial point of view to ensure that only securities of clearly identified quality are retained. This universe constitutes the list of securities eligible for investment.

3° Construction of the fixed-income portfolio/segment: this part of the process is based on active management of the average life of securities in line with expectations of central bank interest rates in the Eurozone, management of the money-market yield curve, management of €STR fluctuations over the month and definition of the classification. The distribution between variable and fixed rates will fluctuate in line with expectations of changes in interest rates. In addition, credit risk is managed on a day-to-day basis to seek to optimise the portfolio's return through a rigorous selection of issuers.

To select and monitor fixed-income securities, the management company does not rely exclusively or automatically on rating agencies. It gives priority to its own credit analysis, which serves as the basis for management decisions taken in the interest of unitholders.

The fund has the French SRI label.

The non-financial analysis carried out using the proprietary model leads to the exclusion of at least 20% of the initial investment universe. At least 90% of the directly held securities and UCIs selected by the management team incorporate non-financial criteria. The Fund may invest up to 10% of its net assets in directly held securities and units or shares of UCIs that do not incorporate non-financial criteria. As a result of the financial analysis, companies with the highest ESG ratings are not automatically included in the portfolio construction. At the end of the selection process, the manager ensures that the instruments in the portfolio are of high credit quality using an internal process of analysis and assessment of high quality by the management company, or by reference, but not exclusively, to the short-term ratings of the ESMA-registered rating agencies that have rated the instrument and that the management company will deem the most relevant, while avoiding any mechanical dependence on these ratings. If the instrument is not rated, the management company determines an equivalent quality through an internal process. A money market instrument is not of high credit quality if it does not hold at least one of the two highest short-term ratings determined by the management company's analysis.

The UCITS limits its investments to financial instruments with a maximum residual maturity of 2 years or less, provided that the rate can be revised within a maximum period of 397 days. The weighted average maturity (WAM) is less than or equal to 6 months. The weighted average life (WAL) of the financial instruments is less than or equal to 12 months.

Exceptionally, it may invest more than 5% of its net assets and up to 100% of its net assets in money market instruments issued or guaranteed individually or jointly by certain sovereign, quasi-sovereign or supranational entities. Instruments issued in currencies other than the euro are systematically hedged to offset currency risk.

It may also invest in:

- futures or options and securities with embedded derivatives used to hedge against and/or obtain exposure to interest rate risk, credit risk and currency risk. Direct or indirect exposure to equity and commodity risk, even through financial contracts, is prohibited.

## MANAGEMENT COMMENT

---

Post-pandemic supply-side tensions and the war in Ukraine sent the entire global economy into an inflationary spiral. In Europe, this resulted in a gradual rise in swap rates throughout the year. In the first half of the year, the ECB sent out more and more signals to the market, making clear its firm intention to raise rates in July. Faced with a steady rise in prices and resilient growth, the ECB surprised with its first 50bp hike, bringing money market rates close to zero. The summer of 2022 marked the end of 7 years of negative returns on money market funds. The last quarter of 2022 was marked by inflation of around 10% in the Eurozone. Christine Lagarde has consistently stated that fighting inflation is her priority. This resulted in unprecedented monetary tightening until March 2023, with 6 successive rate hikes since July 2022. This put the ECB's deposit facility rate at 3% at year-end.

Against this inflationary backdrop, we have maintained a low average maturity and low credit sensitivity. In our investments, we have continued to give priority to vehicles offering the best liquidity.

The performance of the fund's units over the financial year is listed below:

- FR0000979825 (IC) : 0.76%
  - FR0010948190 (ID) : 0.76%
  - FR0013258886 (ES) : 0.81%
  - FR0013353828 (RC) : 0.73%
  - FR0013400546 (RC2) : 0.67%
  - FR001400DG78 (S) : 0.83% since 7/11/2022
- compared with 0.69% for the benchmark (capitalised Ester).

### - Article 8 SFDR – TAXONOMY

The UCI's investment strategy incorporates non-financial criteria according to a methodology developed by Crédit Mutuel Asset Management's non-financial analysis department. The aim is to exclude securities with the lowest environmental, social and governance ratings, in order to reduce the impact of the sustainability risk to which the UCI is exposed.

The management team strives to take into account in its investment decisions the European Union criteria for economic activities considered sustainable under the Taxonomy Regulation (EU) 2020/852. Identifying issuers within the Fund whose activities are eligible for Taxonomy is a main issue for Crédit Mutuel Asset Management. Work is underway to determine a minimum percentage of alignment with Taxonomy.

The principal adverse impacts are also taken into account in the investment strategy.

Crédit Mutuel Asset Management applies to its entire range of UCIs:

- a controversy monitoring policy designed to detect securities on which controversies appear. Depending on the analysis carried out, the securities concerned are kept or excluded,
- a strict sector exclusion policy, notably concerning controversial weapons,

These policies are available on the Crédit Mutuel Asset Management website.

The “do no significant harm” principle applies only to those investments that qualify as sustainable investments under the SFDR (EU) 2019/2088 and takes into account the European Union's criteria for environmentally sustainable economic activities.

The investments underlying the remaining portion of this financial product do not take into account the European Union's criteria for environmentally sustainable economic activities.

Sector policies:

As part of its strategic objectives, Crédit Mutuel Asset Management is gradually developing a set of sector policies linked in particular to the Social and Mutualist Responsibility policy of Crédit Mutuel Alliance Fédérale. Details of the management company's sector policies are available on the Crédit Mutuel Asset Management website.

The monitoring and control of their application is carried out at two levels:

- by setting up a pre-trade control system to prevent the subscription of prohibited securities through the application of sector policies (2);

- by setting up a post-trade control system to identify securities in the portfolio (excluding index funds and formula funds created before November 2019) that are prohibited by sector policies;
- by the CSR Committee (quarterly), which meets with General Management to supervise and monitor the application of sectoral policies. In particular, this Committee takes note of the qualitative analyses carried out by the Responsible and Sustainable Finance Division on issuers concerned by the various sector policies.

Coal sector policy:

At the level of the portfolio management company (3), in the past financial year we note the update of the "GCEL" list (4) by the NGO Urgewald, which is the benchmark for the implementation of our sector policy.

The list now includes a total of 3,091 issuers, distributed as follows:

- 1124 "coal developer" (5);
- 1967 issuers identified on the basis of non-compliance with at least one of the four criteria of our sector policy:
  - Annual coal production < 10 MT;
  - Installed coal-based power capacity < 5 GW ;
  - Proportion of thermal coal in revenues < 20%;
  - Proportion of coal in the energy mix < 20%

The CSR Committee, a governance body that monitors the application of our sector policies, confirmed the "authorised" status of 10 issuers on the GCEL 2022 list, but committed to a plan to phase out coal by 2030.

All in all, the implementation of our sector policy results in the exclusion of 99.7% of issuers from the GCEL 2022 list. This high level of exclusion is explained, among other things, by the extension of the ban on an issuer to the entire Group to which it belongs.

Defence and Security sector policy:

The Defence and Security sector policy has two components:

- Exclusion of companies involved in controversial weapons, unconventional weapons and weapons of mass destruction;
- Monitoring of controversies involving companies involved in military combat weapons.

With regard to conventional weapons activities, Crédit Mutuel Asset Management's Responsible and Sustainable Finance (FRd) Division pays particular attention to companies involved in military combat weapons and which are the subject of very severe controversies related to defence and security activities. This analysis may lead to exclusion.

Over the last 18 months, the management company has not had to formulate any new exclusions or place any companies under surveillance.

Hydrocarbon sector policy:

In 2022, CM-AM worked to implement a hydrocarbon sector policy that will be applied from 1 January 2023, as part of the sector policies implemented within Crédit Mutuel Alliance Fédérale.

In particular, it provides for the freezing of positions of issuers appearing on the so-called "GOGEL" list, produced by Urgewald, and failing to meet the following threshold:

- the share of unconventional oil and gas production is greater than 25% from 01/01/2023;

The scope used to define the unconventional part of hydrocarbons is that of the NGO Urgewald, namely:

- shale oil or gas,
- oil from oil sands,
- heavy and extra-heavy oil,
- deepwater oil,
- oil extracted in the Arctic,
- coalbed methane.

As at 1 January 2023, the application of the sector policy resulted in the exclusion of 481 issuers out of a total of 789 listed in the 2022 GOGEL. The exclusion rate was thus 61%.

-----

- (1) CSR policy adapted to Crédit Mutuel Alliance Fédérale's specific organisation.
- (2) Commissioning in the second half of 2021.
- (3) Management Company.
- (4) Published in end-2022.
- (5) Development of new coal production capacity.

The management of this UCI is based on measurable objectives that take non-financial criteria into account. The management's commitment is significant and relates to one of the following approaches: a "rating improvement" approach in relation to the investable universe, a "selectivity" approach in relation to the investable universe, an "improvement of a non-financial indicator" approach in relation to the investable universe, or any other significant approach (including the combination of the above-mentioned approaches) that is documented.

- **Calculated indirect management fees**

EUR 740,080.11

- **Addendum - Article 8**

The Addendum disclaimer appears on the last page of the annual report.

Pursuant to implementing decree no. 2021-663 of Article 29 of the Energy and Climate Law of 27 May 2021, the information to be disclosed is now the subject of a specific report published no later than 30 June of each year on the Crédit Mutuel Asset Management website on the following page, where all information on the asset management company's ESG approach is also available:

Responsible finance | Crédit Mutuel Asset Management - Non-professionals ([creditmutuel-am.eu](https://creditmutuel-am.eu))

- **Transparency of securities financing transactions (SFTR)**

During the year, the Fund did not carry out any securities financing transactions subject to the SFTR, i.e. repurchase agreements, commodity securities lending/borrowing, reverse repurchase agreements, sell/buy transactions, margin call lending transactions or total return swaps (TRS).

# **ACCOUNTING REPORT**

## **• LEGAL INFORMATION**

Past performance is no guarantee of future results.

### **• Turnover commissions and intermediation fees**

The report on intermediation fees provided for in the General Regulation of the French Financial Markets Authority (Autorité des Marchés Financiers - AMF) is available at: [www.creditmutuel-am.eu](http://www.creditmutuel-am.eu) and/or from Crédit Mutuel Asset Management, 4 Rue Gaillon, 75002 Paris.

### **• Manager's policy on voting rights**

In accordance with the AMF's General Regulation, voting policy information and minutes are available on the management

company's website and/or at its registered office. The voting policy is consistent with the investment policy, the objective of which is to seek consistent long-term performance in accordance with the fund's management guidelines. It takes into account the specificities of each country in terms of company law and corporate governance. The principles of CREDIT MUTUEL ASSET MANAGEMENT's voting policy are as follows:

- respect for the rights of minority shareholders and equity among shareholders,
- transparency and quality of the information provided to shareholders,
- balance of power between management bodies,
- sustainability and integration of companies' long-term strategy,
- support for best corporate governance practices. In employee shareholding funds, the voting rights attached to the company's shares are exercised by the Supervisory Board.

### **• Procedure for selecting and assessing intermediaries and counterparties**

Selected intermediaries are listed and reviewed at least once a year by the management company. The method used is an annual overall scoring system for each intermediary enabling it to be given a rating that determines whether or not it should be included in the list of authorised intermediaries. The rating obtained is based on specific elements considered to be determining factors. In decreasing order of importance: the intermediary's commitment to quantities to be traded and delivered, execution quality, responsiveness when receiving/placing orders, number of settlement/delivery incidents, relevance of information provided. Compliance with negotiated rates is a condition for the intermediary to remain on the list.

### **• Information relating to the methods used to calculate overall risk**

Overall risk on financial contracts is calculated using the commitment calculation method.

### **• Remuneration policy**

Crédit Mutuel Asset Management bases its remuneration policy on the principles of Crédit Mutuel Alliance Fédérale (see the Banque Fédérative du Crédit Mutuel website - Investor Relation - Regulated / financial Information) while complying with regulatory requirements. Crédit Mutuel Alliance Fédérale has established a single remuneration committee whose scope extends to all of its subsidiaries.

As a reminder, the remuneration policy applicable to investment fund managers is dictated by Directives 2014/91/EU of 23 July 2014 (UCITS V) and 2011/61/EU of 8 June 2011 known as the AIFM Directive as well as their transposition texts.

#### A. Operational Process

The Caisse Fédérale de Crédit Mutuel remuneration committee conducts an annual review of the principles of the remuneration policy and expresses its opinion on the senior management proposals prepared after consultation with the risk management and compliance department

Crédit Mutuel Asset Management's remuneration is based on two major criteria: The performance of the fund(s) managed by the employee, the individual contribution to the company's activities and compliance with risk and compliance rules. For further information, please see the Crédit Mutuel Asset Management website.

#### B. Identified employees

Crédit Mutuel Asset Management has identified risk takers according to two criteria:

- Role and responsibility of employees in order to determine the risk-takers at the level of the Management Company and the UCITS/AIFs managed,
- Remuneration to determine which employees should be considered as risk-takers, based on their remuneration.

The following are considered as identified personnel:

- the Chief Executive Officer, the Deputy Chief Executive Officer, Chief Investment Officer and the managers in charge of: the divisions of Management, Responsible and Sustainable Finance, the Legal and Financial Department, the Distributors Relations Department, the Risk Department, the Support Services Department, the Human Resources Department and the Head of Internal Control and Compliance (RCCI)
- employees assigned to Crédit Mutuel Asset Management's asset management activities: the managers.

#### C. Remuneration

Some Crédit Mutuel Asset Management employees receive discretionary bonuses in addition to their fixed remuneration. These are mainly managers and senior management. In order to limit risk-taking, discretionary remuneration arrangements should allow for performance and risk to be taken into account. In all cases, risk management, ethical conduct and customer interests must take precedence over financial performance.

Crédit Mutuel Asset Management may decide not to grant these discretionary bonuses if circumstances so justify. In particular, these individual bonuses may be reduced or even set at zero in certain circumstances, notably in the event of harm to customers' interests or a serious breach of ethics. The payment of guaranteed bonuses is exceptional, and applies only to the hiring of a new member of staff, and is limited to the first year.

In 2022, total gross remuneration paid to 260 employees during the year amounted to €18,048,053, including €1,405,500 in bonuses. Remuneration paid to employees with an impact on the management company's risk profile amounted to €7,434,093.

Discretionary bonuses are paid in March of the year (n+1) when a view of the year (n) is available. These bonuses are limited to an annual unit amount of €100,000 and are not subject to deferral. In the event of a revision of the remuneration policy allowing the payment of discretionary bonuses in excess of €100,000, Crédit Mutuel Asset Management would inform the AMF in advance and bring its remuneration policy into line with the UCITS V and AIFM directives, in particular by providing for the conditions for deferral over a minimum period of three years.

- **Key events during the period**

07/11/2022 Management characteristics: SFDR regulatory update

07/11/2022 Management characteristics: Taxonomy regulatory update

07/11/2022 Features of units (excluding expenses): Deletion of a reference to performance fees

02/01/2023 Expenses: Display of charges - FROG breakdown

02/01/2023 Management characteristics: Compliance with the Taxonomy regulation

02/01/2023 Management characteristics: Addition of SFDR appendix

- **ACCOUNTING PRINCIPLES AND METHODS**

The annual financial statements are presented in the form prescribed by ANC Regulation 2014-01 as amended.

Accounting items are presented in euros, the, the UCI's accounting currency.

- **Revenue recognition**

Financial accounts are recorded at their amount plus any related accrued interest.

The UCI recognises its income on a receipts basis.

- **Recognition of portfolio inflows and outflows**

Inflows and outflows of securities in the UCI's portfolio are recognised excluding charges.

- **Allocation of distributable amounts**

IC units:

For income: total accumulation

For capital gains or losses: total accumulation

ID units:

For income: distribution of net income

For capital gains or losses: total accumulation

- **Outperformance fee**

**FR0000979825 IC units**

40% including tax of the performance net of fixed management fees exceeding the capitalised €STR, even if this performance is negative

(1) The performance fee is calculated using the indexed method.

The additional performance to which the 40% tax-inclusive rate applies is the difference between:

- the level of the UCI's net asset value, net of fixed management fees, before taking into account the provision for outperformance fees and
- the value of a benchmark asset that has achieved a performance equal to that of the benchmark over the calculation period and that has recorded the same variations linked to subscriptions/redemptions as the UCI.

(2) As from the fund's financial year beginning 18/02/2022, any underperformance of the fund in relation to the benchmark over the last five years is offset before outperformance fees become due. To this end, an extendable observation period of 1 to 5 rolling years is set up, with the calculation reset to zero each time the outperformance fee is deducted.

(3) On each net asset value calculation:

- In the event of outperformance in relation to the outperformance trigger threshold, a provision is made.
- In the event of underperformance in relation to the outperformance trigger threshold, a reversal of the provision is made within the limits of the available provisions.

(4) In the event of outperformance, the fee is payable annually on the last net asset value of the financial year.

It is capped at the difference between the maximum fixed management fee set out in the prospectus and the fixed fee actually charged.

The aggregate of the actual fixed management fee and the performance fee is capped daily at the maximum fixed management fee set out in the prospectus.

#### **FR0010948190 ID units**

40% including tax of the performance net of fixed management fees exceeding the capitalised €STR, even if this performance is negative

(1) The performance fee is calculated using the indexed method.

ANNEE 19	5%	0%	OUI

#### Notes relatives à l'exemple :

\*La sur/sous performance nette se définit ici comme étant la performance du fonds au-delà/en-deçà du taux de référence.

\*\*La sous-performance de l'année 12 à reporter à l'année suivante (ANNEE 13) est de 0 % (et non de -4 %) car la sous-performance résiduelle de l'année 8 qui n'a pas encore été compensée (-4 %) n'est plus pertinente dans la mesure où la période de cinq ans est écoulée (la sous-performance de l'année 8 est compensée jusqu'à l'année 12).

\*\*\*La sous-performance de l'année 18 à reporter à l'année suivante (ANNEE 19) est de -4 % (et non de -6 %) car la sous-performance résiduelle de l'année 14 qui n'a pas encore été compensée (-2 %) n'est plus pertinente dans la mesure où la période de cinq ans est écoulée (la sous-performance de l'année 14 est compensée jusqu'à l'année 18)

#### Retrocessions

The accounting policy for management fee retrocessions on target UCIs held is decided by the management company.

These retrocessions are recorded as a deduction from management fees. The charges actually borne by the fund are shown in the table "Management fees borne by the UCI". Management fees are calculated on the basis of average net assets at each net asset value and cover financial management, administrative and valuation costs, custodian fees, statutory auditors' fees, etc. They do not include transaction costs.

#### Transaction costs

Brokerage fees, commissions and charges relating to the sale of securities held in the portfolio, and to the purchase of securities with proceeds either from the sale or redemption of securities or from the income of assets held in the fund, are deducted from the said assets and reduce the fund's liquid assets.

## Valuation method

At the time of each valuation, the assets of the UCITS/AIF are valued in accordance with the following principles:

### **Listed equities and similar securities (French and foreign securities) :**

The valuation is based on the stock market price.

The stock market price used depends on where the shares are listed:

European stock exchanges: Opening price of the day.

Asian stock exchanges: Last trading price of the day.

Australian stock exchanges: Last trading price of the day.

North American stock exchanges: Closing price of the previous day.

South American stock exchanges: Closing price of the previous day.

If a security is not listed, the last trading price for the previous day is used.

### **Bonds and similar debt securities (French and foreign securities) and EMTNs:**

The valuation is based on the stock market price:

The stock market price used depends on where the shares are listed:

European stock exchanges: Opening price of the day.

Asian stock exchanges: Last trading price of the day.

Australian stock exchanges: Last trading price of the day.

North American stock exchanges: Closing price of the previous day.

South American stock exchanges: Closing price of the previous day.

If a security is not listed, the last trading price for the previous day is used.

If a quotation is unrealistic, the manager must make an estimate that is more in line with actual market parameters. Depending on the sources available, the valuation can be carried out using different methods, such as:

- the quotation of a contributor;
- an average of the quotations of several contributors
- a price calculated using an actuarial method based on a spread (credit or other) and a yield curve
- etc.

### **Units/shares of UCITS, AIFs or investment funds held in portfolio:**

Valuation based on the last known net asset value.

### **Units of securitisation entities:**

Valuation at opening price of the day for securitisation vehicles listed on European markets.

### **Temporary purchases of securities:**

- Repurchase agreements: Contractual value. No repurchase agreements with a term exceeding 3 months.
- Optional repurchase agreements: Contractual value, as the seller's repurchase of the securities is considered sufficiently certain.
- Securities borrowing: Valuation of the securities borrowed and the corresponding repayment liabilities at the market value of the securities concerned

### **Temporary sales of securities:**

- Securities delivered under repurchase agreements: Securities delivered under repurchase agreements are marked to market and liabilities relating to securities delivered under repurchase agreements are maintained at the value stipulated in the agreement
- Securities lending: Loaned securities are valued at the market price of the underlying security. The securities are recovered by the UCITS/AIF at the end of the loan agreement.

### **Unlisted securities:**

Valuation using methods based on asset value and yield, taking into account the prices used in recent significant transactions.

### **Negotiable debt securities:**

Negotiable debt securities purchased with a residual maturity are valued at their market value;

- Market value used:

- BTF/BTAN:

Yield to maturity or daily price published by the Banque de France.

- Other negotiable debt securities:

For negotiable debt securities quoted regularly: the yield or price used are those recorded each day on the market.

For securities not quoted regularly: application of a proportional method with use of the benchmark yield curve adjusted by a margin representative of the intrinsic characteristics of the issuer.

#### **Futures contracts:**

The market prices used to value futures contracts are consistent with those of the underlying securities. They vary according to the market where the contracts are listed:

- Futures contracts listed on European markets: Opening market price for the day or clearing price of the previous day

- Futures contracts listed on North American markets: Closing market price or clearing price of the previous day.

#### **Options:**

The market prices used follow the same principle as those governing the underlying contracts or securities:

- Options listed on European markets: Opening market price for the day or clearing price of the previous day

- Options listed on North American markets: Closing market price or clearing price of the previous day.

#### **Swaps:**

Swaps are marked to market.

Index swaps are valued at the price quoted by the counterparty, and the management company independently checks this valuation.

When the swap agreement is backed by clearly identified securities (quality and duration), these two items are assessed overall.

#### **Forward foreign exchange contracts**

These are transactions to hedge portfolio securities denominated in a currency other than the accounting currency of the UCITS/AIF by borrowing in the same currency for the same amount. Forward currency transactions are valued according to the currency's lender/borrower yield curve.

## **Valuation method for off-balance sheet commitments**

- Commitments on futures are determined at market value. It is equal to the valuation price multiplied by the number of contracts and by the nominal value. Commitments on over-the-counter swaps are stated at their nominal value or, if no nominal value exists, at an equivalent amount.

- Commitments on options are determined on the basis of the option's underlying equivalent. This translation consists of multiplying the number of options by a delta. The delta is the result of a mathematical model (Black-Scholes type) whose parameters are: the price of the underlying, the term to maturity, the short-term interest rate, the option exercise price and the volatility of the underlying. Off-balance sheet items are presented in the economic sense of the transaction, not in the sense of the contract.

- Dividend swaps against performance changes are indicated at their nominal value as off-balance sheet items.

- Backed or non-backed swaps are recorded at their nominal value as off-balance sheet items.

## **Description of collateral received or given**

### **Collateral received:**

None

### **Collateral given:**

In connection with OTC derivative transactions and temporary purchases and sales of securities, the Fund may receive financial assets considered as collateral in order to reduce its exposure to counterparty risk.

Financial collateral received will mainly consist of cash or financial securities for OTC derivative transactions, and cash and eligible government bonds for temporary purchase/sale of securities.

Such collateral is given in the form of cash or bonds issued or guaranteed by OECD member states or their local authorities, or by supranational institutions and organisations of a Community, regional or global nature.

Any financial collateral received must comply with the following principles:

- Liquidity Any financial collateral in the form of securities must be highly liquid and able to be traded rapidly on a regulated market at a transparent price.
- Transferability: Financial collateral is transferable at any time.
- Valuation: Financial collateral received is valued daily at market price or according to a pricing model. A prudent haircut policy will be applied to securities that may show significant volatility or depending on credit quality.
- Credit quality of issuers: Financial collateral is of high credit quality according to the management company's analysis.
- Investment of collateral received in cash: It is invested in deposits with eligible entities, invested in high-quality government bonds (rating meeting the criteria of money market UCITS/AIFs), invested in money market UCITS/AIFs or used for reverse repurchase transactions with a credit institution,
- Correlation: the collateral is issued by an entity that is independent from the counterparty.
- Diversified Exposure to a given issuer shall not exceed 15% of net assets.
- Custody: The financial collateral received is placed with the Custodian or by one of its agents or third parties under its control, or with any third-party custodian subject to prudential supervision and which has no connection with the provider of the financial collateral.
- Prohibition on reuse: Financial collateral other than cash may not be sold, reinvested or used as collateral.

## **Additional information**

Exceptional costs relating to the collection of debts on behalf of the UCITS or to proceedings to enforce a right may be added to the recurring costs invoiced to the UCITS and shown above.

Actual operating costs and other services may exceed the maximum flat rate authorised, in which case the management company will cover the excess. In addition, the management company may have to set aside a provision for the maximum flat rate if actual "operating and other services" costs are lower than the posted rate.

## Sustainable investment objective

**Did this financial product have a sustainable investment objective?**

<input checked="" type="radio"/> <input type="radio"/> <b>Yes</b>	<input checked="" type="radio"/> <input checked="" type="radio"/> <b>No</b>
<input type="checkbox"/> It made <b>sustainable investments with an environmental objective</b> : ____%	<input checked="" type="checkbox"/> It <b>promoted Environmental/Social (E/S) characteristics</b> and while it did not have as its objective a sustainable investment, it had a proportion of 5% of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made <b>sustainable investments with a social objective</b> : ____%	<input checked="" type="checkbox"/> with a social objective
<input type="checkbox"/>	<input type="checkbox"/> It promoted E/S characteristics, but did not make any sustainable investments

### To what extent were the environmental and/or social characteristics promoted by this financial product met?

**Sustainability indicators** measure how the sustainability characteristics of this financial product are attained.

This financial product adopts a selective approach, eliminating 20% of the lowest-rated issuers on the internal ESG score from its investable universe. It also promotes environmental and social characteristics by aiming to outperform two sustainability indicators in relation to its ESG universe: carbon footprint and companies with a policy of respecting human rights

### ● **How did the sustainability indicators perform?**

- The sustainability indicators used by this financial product are ESG score, carbon footprint (performance indicator 1) and companies with a human rights policy (performance indicator 2).
- The financial product's ESG score is 6.5/10.
- The carbon footprint is 26.9 tonnes of CO2 per million euros invested at the end of the period. This indicator outperformed its ESG comparison universe, which had a carbon footprint of 141.7 tonnes of CO2 per million euros invested.
- The human rights indicator was 0 companies at the end of the period. This indicator has remained at its maximum level over the past period, outperforming the reference universe. This is due to the strict application of an exclusion of companies that are the subject of controversy considered to be serious.
- The proportion of sustainable investments

### ● **...and compared to previous periods?**

N.A.

### ● **What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?**

For funds with no sustainable investment objective: N/A

**Principal adverse impacts** are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

### ● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

**How have the adverse impact indicators been taken into account?**

**Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

For funds with no sustainable investment objective: N/A

**The investment strategy** guides investment decisions based on factors such as investment objectives and risk tolerance.

## How did this financial product consider principal adverse impacts on sustainability factors?

The principal adverse impacts, in addition to determining the revenue that contributes to the SDGs, were used to determine whether an investment was sustainable or not (see previous question). The financial product manager also had access to the raw data for the sustainability indicators, via the ISS data provider. The principal adverse impacts were therefore considered both directly (through the use and monitoring of raw data) and indirectly (through integration into the proprietary methodology for determining sustainable investment).

## What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is:  
**01/04/2022 - 31/03/2023**

Top investments	Sector	% of assets	Country
CREDIT AGRICOLE SA	Finance	5.03	FRANCE
BANQUE FEDERATIVE DU CREDIT MUTUEL	Finance	2.52	FRANCE
NORDEA BANK ABP	Finance	2.52	FINLAND
BNP PARIBAS	Finance	2.49	FRANCE
BANQUE FEDERATIVE DU CREDIT MUTUEL	Finance	2.00	FRANCE
ENGIE	Utilities	1.89	FRANCE
SOCIETE GENERALE	Finance	1.89	FRANCE
THE TORONTO DOMINION BANK	Finance	1.76	CANADA
VOLKSWAGEN AG	Consumer discretionary	1.63	GERMANY
NATIONAL AUSTRALIA BANK LTD	Finance	1.51	AUSTRALIA

## What was the proportion of sustainability-related investment?

### What was the asset allocation?

The table below shows the allocation between sustainable investments (environmental or social) and non-sustainable investments.

The financial product commits to a minimum of 5% sustainable investment, as a proportion of the fund's total assets.

The indicator used to determine the percentage of sustainable investment is based on Crédit Mutuel Asset Management's own methodology, which makes it possible to classify an investment as 'sustainable'.

This methodology is divided into 3 steps:

- identification of companies and issuers whose turnover contributing to the achievement of sustainable development objectives exceed 5%
- assessment of the principal adverse impacts that could weaken the initial contribution proposal
- assessment of good governance practices

This process makes it possible to qualify companies and issuers as 'sustainable' or 'non-sustainable'.

Excluding ancillary and derivative cash (authorised by the financial product prospectus up to a maximum of 10% of the fund's total assets), all directly held securities (90%) are therefore considered 'sustainable' (according to the methodology described above).

**#1 Sustainable** covers sustainable investments with environmental or social objectives.

**#2 Not sustainable** includes investments which do not qualify as sustainable investments.

### In which economic sectors were the investments made?

Investments were mainly made in the following sectors:

- Food and beverages
- Insurance
- Automotive, equipment
- Banks
- Industrial goods and services
- Real estate
- Household and care products
- Health
- Utilities
- Financial services
- Sovereign
- Supranational
- Technology
- Telecommunications

## To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The data relating to the proportion of Taxonomy-aligned companies or issuers (turnover, CapEx, OpEx) are for the vast majority of the data estimated by non-financial data providers. Insofar as this data is not disclosed directly by the companies or issuers (but extrapolated by external parties) and in accordance with the recommendations of the French Financial Markets Authority (Autorité des Marchés Financiers - AMF), we have chosen not to publish estimates related to the EU Taxonomy.

None of our investments are therefore deemed to be aligned with the EU Taxonomy.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds\*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds**

1. Taxonomy-alignment of investments **excluding sovereign bonds**

\*For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

**Enabling activities** directly enable other activities to make a substantial contribution to attaining an environmental objective.

**Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

### What was the share of investments made in transitional and enabling activities?

N/A

### How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

N/A

## What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

All sustainable investments with an environmental objective were not aligned with the EU Taxonomy, i.e. 12.5% (see Asset Allocation table).

## What was the share of socially sustainable investments?

The share of socially sustainable investments was 6.1%

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

## What investments were included under “#2 Not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

This financial product could invest, within the limits set out in the prospectus, in French or foreign UCITS. Wherever possible, the 'sustainable' characteristics of the underlyings was identified through transparency; the assets were then allocated to each of the segments. For the sake of consistency, the manager has taken care to select funds with an SRI label (or equivalent) and/or incorporating non-financial or sustainability considerations, in order to ensure that environmental, social and governance considerations are taken into account and thus minimise sustainability risks arising from exposure to the underlying funds.

A proportion of cash, held on an ancillary basis, has been used to ensure a liquidity reserve and to anticipate any movements linked to subscriptions/redemptions by unitholders. As it does not inherit a sustainability characteristic, cash has been recorded in the 'non-sustainable' segment. Wherever possible, mutual fund underlyings (notably money-market funds) have been analyzed transparently, and allocated between 'sustainable' and 'non-sustainable' segments according to Crédit Mutuel Asset Management's "Sustainable Investment" model. In the same way, and where possible, certain derivatives transparently identified as 'non-sustainable' have also been included in these other 'non-sustainable' investments.

## What actions have been taken to meet the environmental and/or social characteristics during the reference period?

A series of first-level controls is planned within the management teams. They ensure compliance with the sustainability constraints set out in the pre-contractual documentation. Second- and third-level controls complete the system.

The controls make it possible to ensure a coverage rate based on an ESG score (minimum 90%) as well as compliance with the principle of selectivity (20% exclusion of the lowest-rated companies or issuers in the universe). For SRI-labelled funds, controls also cover coverage rates and the performance of the two mandatory sustainability indicators used by the financial product.

Lastly, we check that the investment qualifies as a sustainable investment, and that the minimum percentage specified in the pre-contractual documentation is respected at all times.

## How did this financial product perform compared to the reference benchmark?

If the financial product has no reference benchmark: **N.A.**

If the financial product has a reference benchmark: **N.A.**

### How did the designated index differ from a relevant broad market index?

If the financial product has no reference benchmark: **N.A.**

If the financial product has a reference benchmark: **N.A.**

### How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

If the financial product has no reference benchmark: **N.A.**

If the financial product has a reference benchmark: **NA** with comparison of sustainability indicators (including Sustainable Investment percentage if possible) between portfolio and reference benchmark

### How did this financial product perform compared with the reference benchmark?

If the financial product has no reference benchmark: **N.A.**

If the financial product has a reference benchmark: **N.A.**

### How did this financial product perform compared with the broad market index?

If the financial product has no reference benchmark: **N.A.**

If the financial product has a reference benchmark: **N.A.**

**Reference benchmarks** are indexes to measure whether the financial product attains the sustainable investment objective.

## FCP CM-AM CASH ISR

### Statutory auditor's report on the annual financial statements

Financial year ended 31 March 2023

**FCP CM-AM CASH ISR**

4, rue Gaillon  
75002 Paris

**Statutory auditor's report on the annual financial statements**

Financial year ended 31 March 2023

To the unitholders of the CM-AM CASH ISR mutual fund,

## Opinion

In compliance with the assignment entrusted to us by the management company, we have audited the accompanying financial statements of the mutual fund CM-AM CASH ISR for the financial year ended 31 March 2023.

We certify that the annual financial statements provide a true and fair view of the results of operations for the financial year under review and of the financial position and assets and liabilities of the Fund at the end of said financial year, in accordance with the accounting rules and principles generally accepted in France.

## Basis of our opinion

### Audit standards

We conducted our audit in accordance with the professional standards applicable in France. We believe that our audit has provided us with sufficient relevant information on which to base our opinion.

Our responsibilities under these standards are set out in the section entitled “Statutory auditor’s responsibilities concerning the audit of the financial statements” in this report.

### Independence

We conducted our audit in accordance with the independence rules set out in the French Commercial Code and the French Code of Ethics for statutory auditors, for the period from 1 April 2022 to the date of issue of our report.

## Basis of our opinions

In accordance with the provisions of Articles L.823-9 and R.823-7 of the French Commercial Code relating to the justification of our assessments, we bring to your attention the following matters which, in our professional judgment, were the most significant for the audit of the financial statements.

The assessments we have made are part of our audit of the annual financial statements as a whole and the opinion expressed above. We therefore express no opinion on the elements of the annual financial statements taken in isolation.

Complex derivatives are valued according to the methods described in the fund regulations and in the notes. We reviewed the independent valuation procedure in place within the management company and verified that this procedure was correctly applied.

## Specific verifications

We have also performed, in accordance with applicable professional standards in France, the specific verifications required by the laws and regulations.

We have no matters to report regarding the true and fair presentation of the information provided in the management report prepared by the management company, or its consistency with the annual financial statements.

## Responsibilities of the management and persons charged with governance of the annual financial statements

It is the management company's role to draw up annual financial statements that give a fair and true picture in accordance with French accounting rules and principles and to implement the necessary internal control to be able to provide reasonable assurance that they are free from material misstatement, whether due to fraud or error.

As part of the preparation of the annual financial statements, the management company is responsible for assessing the Fund's capacity to continue operating as a going concern, to present in its financial statements, where necessary, information concerning business continuity, and to apply the accounting conventions of a going concern, unless it is planned to liquidate the Fund or terminate its activity.

The management company has prepared the annual financial statements.

# Statutory auditor's responsibilities concerning the audit of the annual financial statements

Our role is to prepare a report on the annual financial statements and to obtain reasonable assurance that the annual financial statements as a whole are free of material misstatements. Reasonable assurance means a high but not absolute level of assurance that an audit performed in accordance with professional standards is free of material misstatement. Anomalies may stem from fraud or errors and are considered material when it can reasonably be expected that, taken individually or together, they could influence the economic decisions of users of the financial statements.

As stipulated in Article L. 823-10-1 of the French Commercial Code (Code de commerce), our audit assignment does not consist in guaranteeing the viability or quality of the management of the Fund.

In the context of an audit performed in accordance with professional standards applicable in France, the statutory auditor must exercise its judgement throughout the course of the audit. Moreover:

- it identifies and assess the risks that the annual financial statements may contain material misstatements, whether from fraud or error, defines and implements audit procedures to resolve these risks, and collects all elements deemed necessary and appropriate in order to give its opinion. The risk of failure to detect a material misstatement resulting from fraud is higher than that resulting from an error because fraud may involve collusion, falsification, deliberate omissions, false statements or by-passing of internal controls;
- it takes due note of the internal control relevant to the audit in order to define audit procedures that are appropriate to the circumstances, and not with a view to expressing an opinion on the efficiency of the internal control;
- it assesses the appropriateness of the accounting methods used and the reasonable nature of the accounting estimates made by the management, and the related information provided in the annual financial statements;
- it assesses the appropriateness of the management company's application of the accounting policy for a going concern and, based on the information collected, whether there is a significant uncertainty linked to events or circumstances that is likely to call into question the Fund's capacity to continue operating as a going concern. This assessment is based on the information collected up to the date of the report, bearing in mind nevertheless that subsequent circumstances or events could jeopardise the continuity of operation. If the statutory auditor observes the existence of a material uncertainty, it shall draw the attention of the readers of its report to the information provided in the annual financial statements on the subject of this uncertainty, or if this information has not been provided or is not relevant, it shall attach reservations to its certification or shall refuse to certify the accounts;
- it assesses the overall presentation of the annual financial statements and whether they provide a true picture of the underlying operations and events.

The statutory auditor
