Europe has been a pioneer in the implementation of environmental, social and governance rules. From now on, beyond shareholder engagement, non-financial criteria are becoming a tool for selectivity but above all for improving social practices, governance and environmental footprint.

2 MANAGEMENT OBJECTIVE

This UCITS is actively managed on a discretionary basis. Its investment objective is to offer performance linked to the trend in international equities which, according to the management company's analysis, are benefiting from the transformations of the economy (digitalisation, automation). A benchmark index is not required for this type of management strategy, in which the manager is allowed flexibility in asset allocation. Nevertheless, the performance of the UCITS may be compared with that of a benchmark index such as the MSCI AC World Index. Asset allocation and performance may differ from the composition of the benchmark.

3 ESG RATING
CREDIT MUTUEL ASSET MANAGEMENT

	Portfolio out of 10	Comparison Indi- cator out of 10
Note globale	5.81	5.53
E rating (Environment)	5.75	5.45
S rating (Social)	4.99	4.8
G rating (Governance)	6.91	6.48

VOTING POLICY available on
the website

Crédit Mutuel Asset Management's proprietary ESG analysis model uses a tool to assess the risks and opportunities related to the environmental and social transitions of the issuers making up the portfolio. The analysis of issuers covers five main pillars: environmental, social, societal, governance and the company's commitment to a socially responsible approach. A rating is then calculated based on three components (environment, social and governance), which enables us to position the portfolio in terms of ESG. The exercise of voting rights and dialogue with issuers round out our responsible investor approach.

4 MANAGEMENT COMMENT

Global equities gained +4.2% (in USD) in February, driven in particular by rises in the US, Chinese and Japanese markets. The prospect of a US rate cut delayed until June, according to the consensus, and a rising US 10-year yield did not dampen investor enthusiasm, which was supported by generally good quarterly results. Your fund rose by 6.7% over the month, significantly outperforming its benchmark (+4.7%). Palo Alto Networks published forecasts that were well below expectations, due to a change in business strategy that should ultimately enable it to gain market share with the consolidation of cyber security solutions. The share price fell by -8.3% in February. Nvidia once again surprised the market with much better results and guidance, as well as encouraging comments on demand related to the deployment of generative artificial intelligence. The company gained +28.6%. We took profits on ARM (+99.6%) following the publication of better-than-expected results and short covering, as the free float was low. The end of the lock-up period in mid-March may present opportunities to add to the stock. While we are convinced of the real disruption of AI, we remain vigilant in trying to anticipate future stock market jolts.

6 A WORD FROM RESPONSIBLE FINANCE

The European legislative process underway since 2021 to produce a directive on the duty of care of companies with regard to human and environmental rights has come to an abrupt halt and may never be resumed. The vote was postponed indefinitely following reservations expressed by certain Member States, leading to fears that the necessary majority would not be in place for its approval. However, legislative work will be suspended in April and will not resume until after the European elections in June, when the post-election European landscape is expected to be less favourable to this directive, which could lead to the project being abandoned altogether.
