MANAGEMENT COMMENTARY

March ended with a status quo for sovereign yields on both sides of the Atlantic. In spite of the apparent stability of yields, there was nevertheless significant volatility, with a gap of 25bp and 20bp between the high and low points for the US and German 10-year yields. At its meeting on 20 March, the Fed kept its key interest rates unchanged for the fifth time in a row, at their highest level in 23 years. Similarly, the ECB left its monetary policy unchanged. The surprise came from the Swiss National Bank, which beat its peers to a first 0.25% rate cut, in view of the “reduced inflationary pressure”. The BTP-Bund spread continued to tighten, while the OAT-Bund spread underperformed following the announcement of a higher-than-expected deficit of 5.5% of GDP in 2023. On the credit side, the euro High Yield segment posted a monthly performance of +0.44% thanks to the outperformance of the BB rating category (+1.04%), while the B category recorded a performance of -0.42% and the category rated CCC or lower underperformed strongly, with a performance of -3.86%. Given the increase in idiosyncratic risk, we sold our residual positions in Altice France and Intrum. The portfolio composition also remains broadly unchanged.

**Benchmark investment rate: Eonia capitalised

***Annual rate of return expected for the fund on the reporting date (after fund management fees and excluding charges applicable to the investment vehicle held, if said vehicle has been selected as part of a life insurance policy). This rate is in no way an undertaking to deliver a return nor a commitment on the part of CM Asset Management. It is provided simply as a guide as it does not take account of potential defaults by issuers, which can be particularly significant in this asset class (high yield) and can ultimately lead to a loss of capital.
